About This Game

Run and jump, collect coins, confront enemies and avoid traps, open gates and find secret stashes. It's a simple 2D platformer with a twist: You're not a hero from the castle about to slay an evil dragon, you're a goblin cook working for the dragon! It starts slowly but things get more and more complicated as you go.

Story

Your master has been robbed by a pesky rogue, and it's kind of your fault. Follow them through 5 different settings, from the dragon's lair in the Fiery temple of Doom, all the way to the Castle Keep, and return the stolen treasure! But beware, the closer you get to civilization, the more dangerous it becomes for a defenseless goblin.

Features

- Over 35 levels filled with enemies, traps and secrets.
- Unique game mechanics for every world.
- Two difficulty settings (casual & old school).
- Ability to save & continue later, for casual players.
- Keyboard (You can rebind the keys) and gamepad support.

-
- Cool music by Kevin MacLeod
 - Legend: Find out more about the world, unlock recipes, check achievements!

i need help with my heroes of the west mod because every time i join a server its say connection to the host lost can someone help me with this

. Lets Say-10/666. Being the first Lacrosse game on steam and running and playing this well is good enough for me to recommend this game

9V10. It's like a modern take on asteroids, the controls are simple, the gameplay is simple, yet has enough finesse for you not to just fall asleep at the keyboard. The game has a good sense of humor, and the customization aspect, like the rest of the game: is simple but rewarding.

My only real problem with the game is that it's really short. But you can make your own missions and ships too, so that's pretty cool.

. Extra titan quest content what else can you ask for?. This is a game where you have to use your noggin' to make choices.

If you enjoy using judgement and logic to conserve resources effectively, this is a game you will enjoy.

If you enjoy optimizing mathematical puzzles under the veil of stat-based RPG, this is a game you will enjoy.

This game is like a grid based dungeon crawler, not totally unlike Desktop Dungeons (except not random at all), or Legend of Grimrock (except completely turn-based, with no reflexes required). It's obvious inspiration is Tower of the Sorcerer. You find stuff, stab baddies like goblins and evil brains with a big pointy sword, get stronger, and try to make to the end alive. It's brimming with secrets and you are generally rewarded for not acting rashly, despite the personality of the protagonist.

If you have heard of DROD before, be warned that this game is utterly unlike most entire into the DROD franchise. It's a puzzle game of a different sort, but that's not a bad thing. Less pure logic and more judicial logic. It's a slow burner, but a good game, and it's pretty cheap for how long it'll take you to make it to the end alive. Give it a shot!. I loved this game its like a mix between the original zelda and the binding of isaac, i also loved the artwork it looks like it was painted in oil paint it adds a nice touch to the grim, gory and a little satanic feel of the game.

I recommend this game to anyone that liked zelda 1 and binding of isaac or anyone thats looking for a game with great artwork or with a funny and sadistic humor and i suggest you pass the game at least once in normal difficulty you dont need to get every single colletible to be able to beat the game.Have fun playing!!

I find this one hard to rate actually. I Kinda like the crazy random visuals and since it's early access I don't want to be too harsh. But there were 3 aspects that annoyed me too much to give it a thumbs up:

First, if you just get a description of what to do to solve a puzzle, it's not really a puzzle anymore.

Second, Wtf is this fall damage? Falling 4 floors down without getting damage and then, on the other hand, losing 20hp when just jumping on the spot? I don't get it.

And third, please don't use stairs which you can only climb by jumping every 2 steps! It's just annoying.

So all in all, I stopped playing in the third chapter after dying from a combination of those stupid stairs and random fall damage...

I look forward to give this game another go though :) ... if it ever gets finished.

Best wishes.. I saw this little gem by chance and since I liked what I saw, plus the apparent dedication of the devs and an existing loyal but small playerbase, I picked it up.

Alien Arena: Warriors Of Mars is a fun oldschool like Arena FPS in a more modern look, featuring martians, robots, drones and humans to dispose of.

It's got several gamemodes, online and offline play, you can host yourself, and all 3 DLC map packs are for free.

Btw: There are more servers around than I had guessed and players as well. Way more than steam shows because it's a cross-platform game.

No prob to find multiple matches.

After installing I just played a DM match with bots that I barely won, the bots are pretty good (several difficulties to choose from).

Update: You can boost with the strafekkeys similar to like Quake, Quake 3 and dodge by tapping the movement keys twice like in UT. Ofc, I still have to get used to the game mechanics and figure some things out.

The regular price is surprisingly low and far too low to be on par with its actual gameplay value, especially now on sale it's so dirt cheap, there is no excuse not to buy it.

Hence, I bought right away another copy for a buddy. ^^

Just try it yourself; if you enjoy Arena FPS, you'll probably like it :). Huge game for a low price. Bombslinger is very surprising, at the first time you could think that it is only a Bomberman-like but it is much more. The sensation of the explosion is brutal, the soundtrack is wonderful, the ennemy are funny and the boss are difficult. Just what I needed for a long time.

Thank you. Good game for a good price. Mash buttons, hope you land on a block, retry a billion times. Pleasantly surprised by how inventive the levels get.. This is a classic tetris game and not a very good one either.

The music could be more variable I think.

The graphics, well, it's tetris blocks within an environment which isn't anything of special.

The worst however, is not being able to choose keys to use and the current setup is at least for me, awful.

Even on sale it's not worth it.. \ud83d\udc4dYes. BORING!!! I HATE HOW THE CAMERA IS SO

\u2665\u2665\u2665\u2665ING ALL OVER THE PLACE AND WHEN YOU SHOOT, THE SCREEN BLURS SO YOU CAN'T EVEN SEE THE ACTION. DON'T BUY
