Paint Tool SAI Lips Tutorial by gorilla-ink (Tim)

Step 1

Start with a base colour first.
Any colour you like. (:
Make the outline simple but also try to make it look normal too.

I only use the main water-brush in Paint Tool SAI, until I get to the highlights on the lips and teeth.

Step 2

Now paint the highlights.
Use a much lighter colour to do this.
If the highlights are not bright enough, I'll copy and paste them a couple of times until I get the look that feels right. If it's too bright I adjust the opacity.

Step 3

Now use a much darker colour to paint the the corners and edges of the lips.
I usually do this on another layer, preferably on a layer just under the lip highlights.

Here's the brush settings I use when painting lips in Paint Tool SAI. These aren't recomended, but they do the job for me.

Step 4

On a layer underneath the lips, paint with a black red shade, fill in the mouth pass the edges of the lips.

Step 5

This is how I paint the teeth.
I use a light yellow-grey colour when painting teeth, since teeth aren't perfectly white.
(It's only the light reflecting off of them that makes them appear white.)

Step 6

Still using the water-brush I add the teeth highlights. Next I use the airbrush brush to intensify the highlights on the teeth.

I hope this tutorial was helpful. :)
